Over **200 million** products sold in 2012  
2012 sales **€4,060M**

Operating result from activity **€415M**  
**25,000** employees worldwide

**43.4%** of the capital held by the founding Group

Sales over the last 3 years  
in € millions

CONNECTED  
WORLDWIDE,  
SHAPING  
THE FUTURE

**I**n 2012, we once again experienced one of the crises in the global economy to which we have become accustomed over the past few years. The worsening financial situation in many countries and the austerity measures that have followed have necessarily affected consumption. In addition, the decreasing traffic in shops in favour of the Internet has led to a highly competitive and promotional environment, which naturally hit the Group.

In this context, our 2012 performance can be considered respectable. The near stability of our sales, which for the first time exceeded 4 billion euros, as well as the limited decline in our Operating Result from Activity, which is still at one of the Group's all time highs, are performances that must be seen in the perspective of ten extremely dynamic years.

This evolution reflects the robustness of our business model based on innovation, the strength of our brands, our in-depth knowledge of retail and our resolutely international strategy. It is also a measure of the progress made in terms of industrial performance, new products as well as our commitment to employment, social and environmental issues.

In a macroeconomic climate that remains tense and uncertain, we have embarked upon 2013 with cautious confidence and we are ready to adapt our management approach to any changes in the economic situation. At the same time, we strive to stimulate the market with a robust product plan and pursue our international development.

No matter what stormy waters we must weather, we shall firmly hold on to the helm and remain confident in the future.

*T de la Tour d'Artaise*

338 NEW PRODUCTS  
AND MODELS IN 2012

AN INNOVATION COMMUNITY  
COMPRISING NEARLY  
1,300 PEOPLE

### AN OPEN INNOVATION POLICY

*In order to widen its area of investigation, which today goes beyond small domestic equipment, the Group relies on external resources in an open innovation policy that involves universities, specialist institutions, private companies and dedicated projects such as Open Food System. Early 2013, SEB Alliance invested in the company ETHERA, which develops innovative solutions to measure and eliminate indoor air pollutants.*

# BUILDING ON OUR MOMENTUM

With a presence in nearly 150 countries, the Group is continuing its long-term international expansion and consolidating its leadership by combining a global vision with a local approach.
